

INDEX

| A | Paragraph | Paragraph | |
|--|--------------------|---|--------------------------------------|
| Abrasion | 1.4.4.1 | Air regulator, use of, in spray application | |
| Of coatings by high wind velocity . . . | 5.2.3.4 | 4.6.5.2 | |
| Repainting coatings subject to | 5.1.6.3 | Airless spray | 4.6.5.1 |
| Abrasion-resistant finishes | 10.2.2.1 | Alkali: In concrete, mortar, stucco and plaster | 5.2.2.3 |
| Abrasive blasting. See Blast cleaning. | | Paints sensitive to Alkyds | 6.2.2 |
| Abrasive blasting helmets | 3.1.2.3 | Oil | 6.2.3 |
| Abrasive, effect of . . . | 4.4.2.5 | Alkali Cleaning | 4.4.3.2 |
| Abrasive materials, finishes which resist | 10.2.1.1, 10.2.2.4 | Dermatitis | 3.4.1.3 |
| Acid cleaning | 4.4.3.4 | Use | 4.4.3.2 |
| Concrete and masonry | 4.4.3.4b | Alligatoring | 5.2.4.2 |
| Dermatitis | 3.4.1.2 | Caused by insufficient cleaning | 5.2.6.1 |
| Hazards | 3.1.1.2 | Aluminum: Avoid acid cleaners . | 4.4.3.4 |
| Iron and steel | 4.4.3.4a | Avoid alkaline cleaners | 4.4.3.2 |
| Safety measures | 3.1.2.5 | Characteristics | 5.2.2.2 |
| Acoustic tile coatings .. | 10.2.4.1 | Use of wash primers .. | 4.4.4.3 |
| Adhesion: Effect of incompatible preservatives and paints | 5.2.4.2 | Aluminum mixing varnish . | 6.3.3.2 |
| Effect of insufficient dry between coats . | 5.2.6.5 | Aluminum paints | 6.2.1, 6.3.5 |
| Effect of surface contaminants | 4.4.1 | Heat resistant | 10.2.2.6 |
| To chalked paints .. | 5.1.2.2 | Oleoresinous | 6.2.10 |
| Use of conditioners to improve | 4.4.5 | Preparations of, for use | 7.4.2.2 |
| Use of phosphate treatments to improve | 4.4.4.1, 4.4.4.2 | Phenolic | 6.2.11 |
| Use of wash primers to improve | 4.4.4.3 | Rubber-base | 6.2.13 |
| Administration areas, odorless paints for . | 10.2.2.9 | Use of, to prevent bleeding on treated wood | 8.4.1.2 |
| Advantages of programmed painting | 2.1.2.4 | Use of, to prevent blistering | 5.2.7.2 |
| Air conditioning equip ment, painting of . . | 10.2.3.1 | Aluminum paste | 6.2.10, 6.3.3.2, 6.3.5.2, 7.4.2.2 |
| Air, effect of, on deterioration of exterior coatings . . | 5.1.5.1 | Aluminum silicate | 6.3.4.1 |
| Airfield landing mats, coatings for | 10.2.3.2 | Amines, toxicity | 3.4.1.2 |
| Airfield pavement marking | 11.2.5 | Anti-corrosive pigments in primers for iron and steel | 8.2.4.3 |
| | | Anti-corrosive primers | 6.3.4.2, 8.2.4.3 |
| | | Anti-sweat coatings: Purpose | 10.2.2.2 |
| | | Application | 10.3.2.1 |
| | | Appearance changes . . . | 2.2.5 |
| | | Of exterior paints . . | 5.1.2.1 |
| | | Of interior paints . . | 5.1.3.1 |

| Paragraph | Paragraph |
|--|-------------------|
| Appearance of | |
| coatings | 1.2.5, 2.2.4 |
| Effect of application | |
| method on | 4.6.1.4 |
| Appearance, testing . . . | 4.2.2.2 |
| Application of paint, | |
| effect of: | |
| Environment | 4.6.1.1 |
| Excessive, an abnormal deterioration.... | 5.2.6.4 |
| Insufficient, an abnormal deterioration | 5.2.6.3 |
| Skill | 4.6.1.5 |
| Surface | 4.6.1.2 |
| Type of coating . . | 4.6.1.3 |
| Weather | 1.4.3 |
| Application of paint, | |
| effect of, on | |
| appearance | 4.6.1.4 |
| Application properties, | |
| testing | 4.2.2.2 |
| Arid areas, use of cement | |
| paints | 6.2.3 |
| Asphalt, cause of | |
| alligatoring on . . . | 5.2.4.2' |
| Atmospheric contamination | 5.2.3.2 |
| Atomizing pressures . . . | 4.6.5.2 |
| B | |
| Basic Lead--silico-- | |
| chromate | 8.2.4.3 |
| Bead glazing | 4.5.5.4 |
| Benzol (benzene), | |
| toxicity | 3.4.1.1 |
| Binders, paint | 6.2.1 |
| Toxicity | 3.4.1.1 |
| Bituminous finishes . . . | 10.2.2.3 |
| Cause of alligatoring | |
| on | 5.2.4.2 |
| Bituminous impregnated surfaces, coatings for . | 10.2.4.2 |
| Blast cleaning: | |
| Classes | 4.4.2.7 |
| Degrees | 4.4.2.4 |
| Hazards | 3.1.1.2 |
| Precautions | 4.4.2.6 |
| Procedures | 4.4.2.5 |
| Safety measures . . . | 3.1.2.4 |

| Cables, equipment check | |
| and use | 3.2.2.1e |
| Calcium carbonate | 6.3.4.1 |
| Blast cleaning, continued | |
| Vacuum | 4.4.2.5 |
| Wet | 4.4.2.5 |
| See also Water Blasting. | |
| Bleach, use of, to | |
| to detect mildew . . . | 5.2.3.1 |
| Bleeding: | |
| By preservatives . . . | 5.2.4.1, |
| | 8.4.1.2 |
| Use of sealers to | |
| prevent | 4.4.5 |
| Blistering | 1.4.3, 5.2.6.4e |
| Excessive paint | |
| application | 5.2.6.4 |
| Faulty structural | |
| conditions | 5.2.7 |
| Insufficient dry between | |
| coats | 5.2.6.5 |
| Rapid temperature | |
| changes | 5.2.3.3 |
| Blistering, painting | |
| to prevent | 5.2.7.2, 8.4.1.4 |
| Bosun chair, equipment | |
| check and use | 3.2.2.1d |
| Boxing paints | 4.3.2.2 |
| Brass, finishes for | |
| interior | 7.1.3.2 |
| Brick. See Concrete | |
| and masonry. | |
| Broadcast application of | |
| grit in non-slip | |
| coatings | 9.4.3.1, 10.2.2.8 |
| Brush application | 4.6.3.2 |
| Brushes, artists | 11.1.4, 11.1.5.1 |
| Brushes, paint | 4.6.3.1 |
| Brush-off blast cleaning | |
| After steam cleaning | 4.4.3.3 |
| Classification | 4.4.2.7 |
| Procedure | 4.4.2.5 |
| Buddy system | 3.1.2.6 |
| Bulkheads See Waterfront | |
| bulkheads. | |
| Bulletin colors | 11.1.4, 11.1.5.1 |

| Paragraph | Paragraph |
|---|------------------------------|
| Calking compounds, on exterior surfaces application | 8.4.5.2.1, 8.3.2.7, 4.5.5 |
| Camouflage coatings | 10.2.2.10 |
| Carbon tetrachloride, toxicity | 3.4.1.1 |
| Carelessness, hazards | 3.1.1.2, 3.1.1.3, 3.2.1 |
| Caustic soda | 4.4.3.2 |
| Ceilings: | |
| Brush painting | 4.6.3.2 |
| Roller painting | 4.6.4.2 |
| Cement asbestos surfaces: | |
| Surface treatment | 8.3.2.2.1 |
| See also Concrete and masonry. | |
| Cement--water paint: | |
| Preparation of, for use | 7.4.2.2 |
| Application | 7.3.3.3c |
| Centrifugal blasting | 4.4.2.5 |
| Chalking | 5.1.2.2 |
| Of cement paints | 6.2.3 |
| Effect of, on color retention | 5.1.2.1 |
| Resulting from atmospheric contamination | 5.2.3.2 |
| Chalking paint, tinting | 4.3.3 |
| Use of non-, in humid and wet environments | 8.1.4.4 |
| Chalky painted surfaces: | |
| Adhesion of latex paints | 6.2.7 |
| Repainting | 5.1.2.2, 5.1.6.1 |
| Soiling | 5.1.2.1 |
| Use of conditioners | 4.4.5 |
| Channel glazing | 4.5.5.4 |
| Checking | 5.1.2.2 |
| Resulting from humidity and rainfall | 5.1.5.1 |
| Chemical treatments: | |
| Chemical Conversion Coatings | 4.4.4.4 |
| Exterior | 8.3.2.6 |
| Interior | 7.3.2.6 |
| See also Acid cleaners; Alkaline cleaners; | |
| Pickling. | |
| Chipping hammers | 4.4.2.1 |
| Coastal areas | 8.1.4.3 |
| Abnormal deterioration in | 5.2.3.2 |
| Corrosion in | 5.1.5.1 |
| Coatings, Special Purpose General | 10.0 10.1 |
| Types of coatings used for special purposes | 10.2 |
| Surface preparation and coating application | 10.3 |
| Coating type, effect of, on application | 4.6.1.3 |

| Special | 4.3.3 |
| Tinting | 4.3.3.1 |
| In traffic paints | 11.2.2.3 |
| Use of, for safety and efficiency | 1.2.4 |
| Compatibility of Coatings | 6.3.11 |
| Compatibility with old painted surfaces | 5.2.4.2, 6.3.11, 7.1.3.1 |
| Compressed board | 7.1.3.1 |
| Concrete and masonry: | |
| Characteristics | 5.2.2.3 |
| Effect of, on normal deterioration | 5.1.5.2 |
| Primers for exterior | 8.2.4.2 |
| Repainting exterior | 5.1.6.1 |
| Selection of coatings for interior | 7.4.1.2 |
| Surface treatment | 7.3.2.2 |

| Paragraph | Paragraph |
|---|----------------|
| Concrete block: | |
| Finishes for interior | 7.1.3.2 |
| See also Concrete and masonry. | |
| Condensation, prevention of | 10.1.2 |
| With anti-sweat coatings | 10.2.2.2 |
| Conditioners | 4.4.5 |
| Conditioning | 1.1.3.3 |
| Contaminants. See Surface contamination; Atmospheric contamination. | |
| Contractors | 2.2.2.2 |
| Controlled chalking | 5.1.2.2 |
| Conversion treatments | 1.1.3.3, 4.4.4 |
| Cooking, moisture from | 5.2.7.2 |
| Cooling equipment, painting | 10.2.3.1 |
| Copper: | |
| Characteristics | 5.2.2.2 |
| Finishes for interior | 7.1.3.2 |
| Copper naphthenate, cause of abnormal deterioration | 5.2.4.1 |
| Corrosion: | |
| In coastal areas | 5.1.5.1 |
| Resistance of epoxy paints | 6.2.4 |
| Resistance of vinyl paints | 6.2.17 |
| Corrosive environments | 8.1.4.5 |
| Costs, painting | 2.1.2.3 |
| Example | 2.1.2.4 |
| Cracking of coatings | 2.1.1, 5.1.2.2 |
| Due to excessive paint application | 5.2.6.4 |
| Due to humidity and rainfall | 5.1.5.1 |
| During exterior exposure | 5.1.2.2 |
| During interior exposure | 5.1.3.2 |
| Crawl spaces, importance of, in abnormal deterioration of coating | 5.2.7.1 |
| Crawling | 5.2.4.2 |
| Due to insufficient cleaning | 5.2.6.1 |
| Creosote, effect of, on, abnormal deterioration | 5.2.4.1 |
| Creosote impregnated surfaces, coatings for | 10.2.4.2 |
| Crew, in-house | 2.2.2.2 |
| Crumbling of coatings | 5.1.2.3b |
| Cure of paints: | |
| Effect of improper, on, abnormal deterioration | 5.2.2.3 |
| Effect of improper | 6.2.3 |
| D | |
| Dacron rollers | 4.6.4.1 |
| Dampness, effect of | 1.4.3 |
| Dark room coatings | 10.2.3.5 |
| Decorative painting | 1.2.5 |
| Defective Paint Materials | 4.2.4 |
| Defense, painting for passive | 10.2.2.10 |
| Definition of terms | 1.1.3 |
| Degradation: | |
| Exterior coatings | 5.1.2.2 |
| Interior coatings | 5.1.3.2 |
| Degreasing solvent | 4.4.3.1 |
| Dermatitic paint materials | 3.4.1.2 |
| Safety measures | 3.4.2.1 |
| See also Skin irritants. | |
| Detergents, use of: | |
| Acid cleaning | 4.4.3.4 |
| Cleanup after painting | 4.6.7 |
| Steam cleaning | 4.4.3.3 |
| Deterioration of coatings | 2.2.5, 5.0 |
| Abnormal | 5.2.1 |
| Normal | 5.1.1 |
| Dirt: | |
| Carried by winds | 5.2.3.4 |
| And mildew | 5.2.3.1 |
| Pickup of, on exterior coatings | 5.1.2.1 |
| Discoloration of paints, causes of: | |
| Bleeding | 5.2.4.1 |
| Poor construction | 5.2.7.1 |

| | Paragraph | |
